Course Description

As the culminating capstone of the liberal arts curriculum, this course offers students the opportunity to reflect on and apply knowledge and skills acquired in the first two tiers and in the computer science curriculum. The focus is to engage in independent inquiry, to apply critical thinking to solving specific problems in computer science, and to reflect on this effort as an outcome of the liberal arts education. Students will study the process of and methodologies in computer science research. Presentation of research results and writing of research papers are required. This course also fulfills the final stage of the writing-intensive requirement for the major.

LAC Tier III Independent Inquiry Outcomes

This course meets the Tier III requirements for Independent Inquiry of the Liberal Arts Core Curriculum. This course will achieve the following outcomes:

- Demonstrate the ability to engage in independent inquiry (*Research Project*)
- Apply current and critical thinking in a focused area of study (*Research Project, Article Discussions*)
- Reflect on the context of their Independent Inquiry or artistic creation (*Research Project*)
- Reflect on this work as an outcome of their liberal arts education (*Research Project, Assignments*)
- Effectively communicate ideas orally (*Research Project, Lab Meetings, Article Discussions*)
- Effectively communicate ideas visually (*Research Project, Lab Meetings*)
- Effectively communicate ideas in writing (*Research Project and Related Assignments*)
- Discern the ethical dimensions of the production and acquisition of knowledge within disciplines (*Research Project, Article Discussions*)
- Effectively seek and employ information to achieve academic goals (*Research Project*)

Course Objectives

1. Demonstrate the ability to engage in independent inquiry in the field of computer science
2. Apply current and critical thinking in a focused area of study
3. Reflect on the context of their independent inquiry
4. Reflect on this work as an outcome of a liberal arts education
5. Learn to write, communicate, and present research ideas and results in computer science.

Attendance: Attendance is required. Missing one class without an official excuse will result in 1% deduction from your final grade (up to 5%). In addition, exercises may be assigned and collected during class.

Online discussion: We will use Piazza (<https://piazza.com>) as an online discussion and question and answer forum in this course. Shortly after the beginning of the semester, you will receive an e-mail with registration instructions sent to your Eastern e-mail address. Piazza allows for students to post and answer questions, anonymously if desired. The class benefits by seeing questions asked by other students (who often have the same questions as you) and by contributing answers. As the instructor, I will answer questions and can endorse correct student answers as well. For these reasons, all non-personal (e.g., not grade-related) questions should be posted to Piazza rather than e-mailed to me. In addition, you will use Piazza to ask your fellow students questions about their projects.

Course Assignments and Grading

Assignment	Due Date*	% of grade
Biography and Potential Topic	1/30/17	5%
Article Critique	2/10/17	5%
Literature Review	2/24/17	10%
Research Proposal	3/3/17	10%
Research Outline	3/31/17	5%
Lab Meetings / Article Discussions	varies	5%
Research Paper – Rough Draft	4/12/17	10%
Research Presentation	varies	15%
Research Paper – Final Draft	5/10/17	10%
Additional Assignments	-	15%
Participation and Online Discussion	-	5%
Class Attendance	-	5%

Academic Honesty

You are encouraged to discuss assignments and your research topic with one another. However, copying work from another student (unless otherwise specified) and *plagiarism* is *cheating* and this will not be tolerated. A student found cheating or plagiarizing will automatically receive a grade of “F” on the assignment and will be reported to the department head with further potential consequences.

General statement: Students should read and understand Eastern’s Academic Misconduct Policy, which can be found in the Eastern Student Handbook at <http://ecsusvkb2.easternct.edu/index.php?View=entry&EntryID=307>. Students are expected to take personal responsibility for their intellectual work and to respect and acknowledge the ideas of others. Academic honesty means doing one’s own work and giving proper credit to others whose work and thought are drawn upon. It is the responsibility of each student to become familiar with what constitutes academic dishonesty and plagiarism, and to avoid all forms of cheating and plagiarism. Students may not engage in any form of academic misconduct, and are responsible for learning how to present the ideas of others in their own work, and avoid all other forms of academic misconduct. For current documentation practices, consult the instructor or a style manual (e.g., APA, MLA). All violations will be handled under the procedures established in the Academic Misconduct Policy.

Classroom civility

Cell phones are not appropriate in class and must be turned off or set to vibrate and stored off of the class desk. In general, follow the Golden Rule and treat others with respect and the way you want to be treated.

Special Accommodations

Eastern Connecticut State University is committed to following the requirements of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. If you are a student with a disability (or think you may have a disability), and require adaptations or accommodations, or assistance evacuating a building in the case of an emergency, please contact the Office of AccessAbility Services (OAS) at 860-465-0189 to discuss your request further. Any student registered with the OAS should contact the instructor as soon as possible for assistance with classroom accommodations. Please note that accommodations are not retroactive, and must be communicated through a Letter of Accommodation which is drafted by the OAS.
