

# Research articles vs. Review articles

- A *research* article describes an investigation that is centered around a specific hypothesis or an objective
- The authors test the hypothesis or meet the objective by designing a method or model, collecting and analyzing data, and drawing conclusions using an appropriate and reproducible methodology
- A research article has a reproducible method involving something other than "searching the literature"
- A *review* article is an article that summarizes what others have done in a way that often organizes findings according to specific methods or themes
- When exploring research topics, review articles can be great places to start, but you will need research articles for your Article Critique and Literature Review

# Article examples

- Research article:

Ahsan, M.M.; Li, Y.; Zhang, J.; Ahad, M.T.; Gupta, K.D. Evaluating the Performance of Eigenface, Fisherface, and Local Binary Pattern Histogram-Based Facial Recognition Methods under Various Weather Conditions. *Technologies* **2021**, 9, 31.  
<https://doi.org/10.3390/technologies9020031>

- Review article:

W. Zhao, R. Chellappa, P. J. Phillips, and A. Rosenfeld. 2003. Face recognition: A literature survey. *ACM Comput. Surv.* 35, 4 (December 2003), 399–458.  
<https://doi.org/10.1145/954339.954342>
